

The FUCOBI Foundation has announced two research and travel awards
for **minority students** from Latin America and the Caribbean, United States
(Puerto Rico, Native Americans, and Pacific Islands), and African countries to attend
the National Shellfisheries Association 113th Annual Meeting
March 21-25, 2021

The Johnnie Castro Montealegre Travel Award - *Covers meeting registration fee.*

- Students interested in applying, please contact fucobi1@gmail.com requesting an application for the Johnnie Castro Montealegre Travel Award and include CV and abstract with all co-authors (ready for submission to the NSA annual meeting, 250-words).

The Jimmy Alcivar-Arteaga Research and Travel Award – 30 awards available. *Covers meeting registration fee.*

- Students interested in applying, please contact fucobi1@gmail.com requesting an application for the Jimmy Alcivar-Arteaga Research and Travel Award and include an abstract with all co-authors (ready for submission to the NSA annual meeting, 250-words).

Abstracts on the following topics will be given priority, but awards are not limited to these topics:

- 1) Metals, glyphosate, Roundup, and bisphenol in mangrove sediment near banana and shrimp farms, and in cow's milk, cheese, and agricultural soil
- 2) Toxicological transgenerational epigenetic inheritance (F0-F3) to assess health risks caused by exposure to glyphosate and Roundup to marine animals (shrimp, molluscs) and people who live near estuaries and wetlands
- 3) Glyphosate-free aquaculture feeds
- 4) Glyphosate-free shrimp
